

Smart System Acceleration

Intel® NUC Kits NUC7i3BNHX1, NUC7i5BNHX1, NUC7i7BNHX1 are built on 7th Gen Intel® Core™ i3, i5, i7 processors respectively, and come with 16 GB Intel® Optane™ memory preinstalled. The result is amazing responsiveness that frees you to start your computer quicker, experience faster game level-loading, and save files in less time. Plus, Intel® Optane™ memory automatically learns your computing behaviors to accelerate frequently performed tasks.

Make it Your Own

A customizable Mini PC kit with the power of a desktop PC. Choose your RAM, storage, and operating system to build the PC you want. This Intel® NUC has room for up to 32 GB of DDR4 RAM and a 2.5" SATA HDD. When combined with Intel® Optane™ memory it offers the best of both worlds – high speed acceleration and affordable large storage capacity.

Small, But Mighty

Featuring one of the latest 7th Generation Intel® Core™ processor, members of the newest NUC lineup offer plenty of choice when it comes to your next highly capable small form factor PC. Whether you're automating your home for security, enjoying 4K entertainment, or making it the brains for your smart home, there's an Intel® NUC for you.
